

A background image showing a close-up of a large, curved metal pipe with several bolts. The image is overlaid with a grid of semi-transparent colored rectangles in shades of red, orange, and grey. The text "PIPELINE planning preparation execution" is overlaid on a dark red rectangular background on the right side of the image.

# PIPELINE

planning  
preparation  
execution

**We build the way from A to B.  
Or A to G, K, Z and back.**

Entec's pipeline planning, preparation and execution services combine best-in-class technology, engineering and extensive industry experience to complete your pipeline projects, even in the most remote locations or difficult ground conditions.

Entec is a Western Canada-based provider of turnkey engineering, design and construction support services with 32 years of experience in **Pipeline Planning, Preparation** and **Execution**.

Our focus on quality design, proven project delivery and leveraging our industry knowledge, allow us to produce tailored project solutions that connect ideas, projects and people.

# Entec offers planning and design consultation, project management, skilled-onsite construction inspection and technical support.

Our skilled management of construction risk factors significantly enhances the predictability of project parameters and increases the probability of a safe and successful installation.

Entec has consulted, engineered and managed to our clients' unique needs. Our team is committed to developing the optimal solution for each individual project conditions, challenges and budget. Our clients benefit by realizing improvements in contracting strategies and negotiations, cost and schedule estimates, permitting and regulatory approvals and preliminary investigation effectiveness.

## Entec applies trenchless technologies to meet our clients' underground construction challenges.

We consistently deliver technical and service excellence while striving to exceed our clients' expectations. Decision making excellence is achieved through clear understanding, communication and documentation.

## Entec's core services continue to grow. Today, we offer in response to clients' needs:

### Engineering Consulting

- Pipeline Engineering
- Design / Build

### Trenchless Technologies

- Microtunneling
- Horizontal Directional Drilling
- Guided Auger Boring
- Pipe Ramming

### Construction Management

### Dewatering / Remediation
